

Successful Starts Kitchen Makeover Project

The Children's Home completed a major project in 2015 to help provide a proper learning environment for independent living – the Successful Starts Kitchen Makeover. The new kitchen resembles an apartment kitchen – the type that many residents will encounter when they embark on independent living. It contains sufficient cabinet and counter space with simple appliances that fit within the budget of a young adult.

The H. Chambers Company donated state-of-the-art design drawings and budget estimates for the kitchen makeover, allowing us to produce the best possible learning space for our older residents. Charles Turner, of The H. Chambers Company, stated the ideas behind the design, "Our goal is to provide residents with an environment which promotes social cooking, circulation, rest and social living. TCH is a great organization giving children a chance to be successful in the real world."
